Logistics and on-demand delivery platform Deliverables (~4 Working months)

- Databases – MySQL

- Admin Panel and Staff Panel

- APIs for Mobile Apps

- Application for customer (Flutter)

Work Scope

APIs

- Restful APIs for mobile Apps

Customer Application: -

1. **Splash Screen**

   ○ **Purpose**: This is the first screen users will see when they open the app. It's a crucial moment to create a good impression. The splash screen will display the app logo or branding, giving users a brief introduction while essential backend processes (like initializing APIs, checking authentication status, etc.) are loading.

2. **Login/Signup with Mobile Number**

   ○ **Purpose**: Simplifies the process for customers to access the app by using their mobile number, which is easy to remember and widely used in similar on-demand service apps like Porter

6.1 Services Screen: Trucks & 2-Wheelers

• **Purpose**: Allows users to select trucks or two-wheelers based on their service needs for local deliveries.

1. Pickup and Drop Location Selection Screen
   o Location Input: Users can enter both pickup and drop-off locations.
   o Saved Locations and History: Display a list of saved locations and previously used addresses, making it easier for users to select familiar destinations.
   o Map Integration: Let users adjust pickup and drop-off points using a map view.
2. Add Stop Screen
   o Purpose: For users needing multiple stops, this screen allows them to add additional destinations. They can add or remove stops before confirming the route.
3. Address Confirmation and Change Screen
   o Summary View: Show a summary of the pickup, drop-off, and any additional stops.
   o Edit Option: Allow users to change or modify any of the addresses before proceeding.

4. List of Rates and Vehicle Selection
   - o Purpose: Display the available rates for different vehicles based on the user's selected route.
   - o Rate Details: Include cost per km and any additional fees for stops or waiting time.
   - o Vehicle Options: Let users select between trucks, two-wheelers, and any other available options based on the service type.
5. Booking Confirmation Screen
   - o Coupon Selection: Show a list of available coupons. Users can apply discounts if eligible.
